George H. Hardy, a boss carpenter, living at 244 West Fifty-second street, had a new lock placed on the front door some days ago, and engaged Gluck to make half a dozen keys, which were to have been finished to-day.

While Mr. Hardy was in the basement with four friends Sunday night, and his wife and daughter were in bed on the floor above, the door of Mrs. Hardy's room was stealthly opened and Mrs. Hardy saw Gluck peering in.

She at once made an outery, and the face in the doorway vanished like a flash. Then she heard the closing of the street door. Her husband, with his friends, appeared the next moment, and she told them a thief had been in the house. An investigation showed that Mr. Hardy's \$5 overcoat had been stolen from the hat rack in the hallway.

Mrs. Hardy told Detective Dale, of the West Forty-seventh street station, she was positive of having seen the burglar's face before. She gave an accurate description of Gluck, and he was arrested and identified by Mrs. Hardy. Her answer was: "Most decidedly, I suppose there is scarcely a morning, at my home, when some member of the amily does not have a boiled egg for breakfast. I always repeat the formu-Remember, precisely three moments in boiling hot water.' Perhaps one time out of seven that egg comes on the table exactly right." Mrs. Terhune neg glected to add that the boiled egg is the rock on which more experience cooks than those in most kitchens come to grief. The shell varies so much hickness that it is well nigh impossible to be sure that it should neither be over nor under-done.

Children's Eating. Some parents compel their children to

eat against their will, as when they come to the breakfast table without an appetite or have lost it in prospect of a visit or a ride, or for the sake of "eat ing their plates clean" in discouragement of wasteful habits. Unless we are thirsty we cannot drink the purest spring water without aversion and, as for eatmg when there is no appetite, it is revolting, as any one may prove to him-McCauley has gained the enmity of a thinks saything of him she will tell him the self by attempting to take a second meal in twenty minutes after having eaten a regular dinner. Cream Peppermints.

Melt two cups of granulated sugar with three-fourths of a cup of cold water, stirring until the sugar is dissolved only. Boil until it hairs, not s second more; for too much cooking spoils it at once. As soon as the syrup has reached the proper consistency, take it from the fire and add eight drops of oil of peppermint, not the essence. Stir constantly with a spoon as it cools, until it is very creamy. It must be stirred rapidly, evenly and constantly. Rol into small balls, and shape with the hands into peppermints.

Sun Bonnets for Wee Maidens.

If the wee maiden of this Summer intends to be in fashion she must wear a sun bonnet. The more old-fashioned and quaint is its design, the more smiles of richer material, such as moire or plushapproval it will receive. The latest sun bonnet is made of dimity, and has a deep cape which falls over the shoul ders. The frill which frames the baby face is also deeper and fuller than those of last season. Dimity sun bonnets match little dimity gowns, and both are trimmed with embroidery. These bon-His Mouth Is Too Big.

Stir together lightly and quickly, Drop on greased tins by the spoonful and bake in a quick oven.

An Old Favorite Style.

Among the Spring novelties in dress materials is a singular combination of the long-time favorite "pin-head check" with the old-new fabric moire silk.

Costly French Chickens.

French chickens, like English mutton, nave a flavor and juiciness that the American poulets never acquire, even in the henneries with glass roofs, steamcoils and other modern improvements. But the Parislan has to pay for these lelicious attributes. Five francs is the orice of a fine chicken in Winter and 80 ents in Summer. It is only for reasting that an "entire poulet" is bought. At the market and Atle shops the frugal nousewife can have 5 cents' worth of internals for sauce, a pound of legs, wines. ecks, second joints, cutlets or breasts for the course, pieced out with toast roquettes and salad.

Anything, Just So It's a Man." It is a singular fact, pointed out by a teen observer, that those hideousty ugly people whom one runs across in this world, who are just this side of deformity, are almost invariably married. Dr. Holmes said once that there was nothing short of a gorilla that a pretty woman could not take and make a hushand out of. But these hideous folk are quite as apt to be women, and they are married, too

A Delicious Dessert. Butter a pudding mould, slice two stale

rolls, dip them in milk and fill in alterslices of roll and layers of mince meat until the mould is full. Make a old custard with five eggs and half a pint of milk, pour it over the pudding and let it rest for half an hour. If the mould does not then appear quite full fill up with milk, cover with paper, put plate over and steam for one hour and a half. Serve with following sauce : Beat the yolks of six eggs with to taste, mix gradually with half a pint of white wine, put in saucepan over fire, stirring well until it thickens; then whisk it well with a wooden fork and pour round the pudding.

A Novel Doll.

That there is always room for novelties cannot be too often asserted. A few years ago an enterprising woman laid the foundation for a very snug little fortune with an idea of her own. She made dolls for the holiday trade as had a careful model made of a small baby, and using this as a mould, had a preparation by which a remarkable imtation of a cunning little, bald-headed infant was produced. The head was cove.ed with stockinet, painted truth-

fully. The finished doll was sold readily. The Word "Bronse." The etymology of the word "bronze" lexicographers. It is left unsolved even "New English Dictionary." the Italian "bronzo," probably from "bruno," brown, is as far as the mono-

syllable has generally been traced. In he Hatzeld-Darmesteter "Dictionnaire de la Langue Français," however, a step beyond "bronze" is taken-to the burialplace of Virgil, Brindisi, the Latin Brundusium, and Prof. Skeat, who has been furnished by a friend with substantial evidence upon the point, now has no hesitation in declaring that it is to the name of the old Italian town that we must look for the correct derivation of bronze.
